Education

- **Korea Advanced Institute of Science and Technology (KAIST)** — Feb. 2025 – Present
  M.S. in Electrical Engineering — *Daejeon, Korea*
- **Kellogg College, University of Oxford** — Aug. 2025 – Feb. 2026
  Visiting Student (Global Cybersecurity Talent Development Program) — *Oxford, UK*
- **Korea University** — Mar. 2020 – Feb. 2025
  B.E. in Cyber Defense (GPA: 4.14/4.5) — *Seoul, Korea*
- **Vrije Universiteit Amsterdam (VU Amsterdam)** — Feb. 2024 – Aug. 2024
  Exchange Student — *Amsterdam, Netherlands*

Experience

- **Graduate Student Researcher** — Feb. 2025 – Present
  Hacking Lab, KAIST — *Daejeon, Korea*
  Advised by: Prof. Insu Yun
- **KITRI Best of the Best (BoB), 11th Cohort** — Jul. 2022 – Mar. 2023
  Vulnerability Analysis Track, Best 10 (out of 200 participants) — *Seoul, Korea*
  Government-funded cybersecurity training with real-world team projects.
- **Undergraduate Student Researcher** — Jan. 2022 – Mar. 2022
  Computer Systems Security Lab, Korea University — *Seoul, Korea*
  Advised by: Prof. Youngjoo Shin

Publications

- **MTEscape: Bypassing Asynchronous Kernel MTE via Conventional Memory Corruption Vulnerabilities**
  Kyeongmin Kim, Insu Yun
  Proceedings of the 33rd ACM Conference on Computer and Communications Security (CCS 2026, to appear)
  The Hague, The Netherlands, November 2026

Conference Talks

- **1 Man, 1 Month, 45 Bugs: Scaling AI Bug Hunting to $100,000+ in Bounties**
  Kyeongmin Kim, Insu Yun
  POC 2026 (to be presented)
  Seoul, Korea, November 2026
- **MTEscape: Bypassing ARM's Asynchronous MTE with General Memory Corruption Vulnerabilities**
  Kyeongmin Kim, Insu Yun
  Hexacon 2026
  Paris, France, October 2026

Honors and Awards

Professional Recognition

- **Microsoft Most Valuable Researcher** — Aug. 2026
  Recognized as a top Microsoft security researcher; ranked 5th on the Windows leaderboard (Q2 2026).
- **Appreciation Award, Korean Association of Cybersecurity Studies (KACS)** — Nov. 2025
  Recognized for proactively detecting and responding to malware distribution activity.
- **Excellence Award, 2025 Chungcheong Regional Cyber Threat Scenario Competition** — Sep. 2025
  Korea Gas Technology Corporation President's Award for a gas-related cyber threat scenario.

Hacking Competitions

- Pwn2Own Ireland 2026 — Oct. 2026
  Successfully exploited Samsung Galaxy S26 (Remote), Home Assistant Green.
- 3rd Place, Cyber Conflict Exercise (CCE) 2026 — General Division (Team: Stegosaurus) — Sep. 2026
- 2nd Place, DEF CON 34 CTF (Team: 0x4b52) — Aug. 2026
- Finalist, Midnight Sun CTF (Team: HackingForMakguli) — Jun. 2026
- Finalist, DreamHack Invitational — Apr. 2025
- Finalist, LakeCTF (Team: CyKor) — Dec. 2024
- Finalist, HITCON CTF (Team: Cold Fusion) — Nov. 2024
- Finalist, DEF CON 32 CTF (Team: Cold Fusion) — Aug. 2024
- 2nd Place, GlacierCTF — Academic Division (Team: CyKor) — Nov. 2023
- 4th Place, HITCON CTF Final (Team: Program-Fur-Mozzi) — Nov. 2023
- Finalist, CODEGATE CTF — University Division (Team: roKyC) — Aug. 2023
- Finalist, Midnight Sun CTF (Team: CyKor) — Aug. 2023
- 3rd Place, Samsung Security Tech Forum CTF (Team: Cy + Kr) — Aug. 2023
- 2nd Place, zer0pts CTF (Team: CyKor) — Jul. 2023
- Special Award, HACKTHEON Sejong (Team: CorKy) — May 2023

Reported Vulnerabilities (Chosen)

- **CVE-2026-50327 (and 2 others)**: Remote Code Execution in Windows Media
- **CVE-2026-50655**: Remote Code Execution in Windows Media Foundation
- **CVE-2026-44812**: Remote Code Execution in Windows Graphics Component
- **CVE-2026-42992 (and 5 others)**: Remote Code Execution in Windows Remote Desktop Client
- **CVE-2026-50497**: Information Disclosure in Microsoft Remote Desktop Protocol
- **CVE-2026-58535 (and 6 others)**: Information Disclosure in Windows Remote Desktop Client
- **CVE-2024-22211**: FreeRDP Heap Buffer Overflow
- **KVE-2023-5003**: Alyac Antivirus Local Privilege Escalation
- **KVE-2022-0980**: V3 Antivirus Local Privilege Escalation

Teaching Experience

- **Introduction to Modern Software Development (EE217)** — Fall 2026
  Teaching Assistant at KAIST (Instructor: John Kim)
- **Introduction to Modern Software Development (EE217)** — Spring 2026
  Teaching Assistant at KAIST (Instructor: Seulki Lee)
- **Introduction to Electronics Design Lab (EE305)** — Spring 2026
  Teaching Assistant at KAIST (Instructor: Jung-Woo Choi, Ian Oakley, Bongjin Kim)
- **Programming Structures for Electrical Engineering (EE209)** — Spring 2025
  Teaching Assistant at KAIST (Instructor: Jaemin Yoo)
